

Math 100C Intermediate Algebra

Winter Quarter 2008

Daily, 11-11:50 am, Hertz 105

Instructor: Prof Richard Hilliard

Email: hilliarr@cwu.edu

Office: Hertz 102A

Office Phone: 963-1720

Office Hours: TBA

Course Description

This course is designed to provide students with the algebra, problem solving, and academic skills needed to be successful in a college Pre-Calculus course. Each lesson will be taught using at least two instructional methods as well as a problem solving or critical thinking application. The course will emphasize appropriate use of the graphing calculator as a mathematical tool.

Course Rationale

The course reinforces numerical, graphical, and traditional algebraic approaches to give the student a better understanding of the mathematical concepts underlying algebra. The use of graphing calculators as a way to visualize mathematical concepts will be emphasized.

Text: *Intermediate Algebra* by Jay Lehmann with MathXL registration code

Calculator: a graphing calculator is required (TI-83+ or TI-84)

Learner Outcomes

Concepts and Procedures

- Model real-world phenomena with a variety of functions.
- Translate among numeric, symbolic, graphical, and real-world representations of functions.
- Identify and use commutative, associative, and distributive properties of the real numbers.
- Recognize, apply, and model the four basic operations of the real numbers numerically, symbolically, and graphically.
- Recognize a variety of problem situations, including real-world phenomena, that can be modeled by the following library of functions: linear (master), quadratic (develop), exponential (develop), and absolute value (develop).
- Solve a system of equations in symbolic and real-world problem form.
- Manipulate rational and radical expressions.
- Model and solve problems using simple rational and radical expressions.
- Understand and use the order of operations for numerical calculations and for algebraic manipulations.
- *Model and solve a variety of problem situations using sequences and series (optional).*
- *Model and solve a variety of problem situations using conic sections (optional).*

Performance Skills

Problem Solving

- modeling real-world phenomena mathematically
- working on extended problems
- drawing on diverse knowledge and methods to solve problems
- applying appropriate technology to solve problems
- posing questions related to a problem
- generalizing problems

Critical Thinking

- Understand the difference between a fact

Writing and Communication

- reading and understanding complex problems
- summarizing the essential ideas of a problem
- describing methods used to approach a problem
- expressing solutions and solution paths in written and verbal form
- evaluating and improving quality of written work

Technology Skills (Basic)

- Find the viewing window of a complete graph.
- Analyze graphs: trace graph, find roots,

- and a hypothesis.
- Make and test hypotheses.
- Create simple arguments to support a position.
- Read and critique another's simple arguments.

- identify visual illusions.
 - Find numerical data to specified accuracy.
- Group Work—Peer Tutoring
- working cooperatively with others, sharing ideas
 - asking for assistance

Guidelines for evaluating and assessing the student's ability to meet the learner outcomes.

Student Advancement

Passing this course requires satisfactory performance in the areas of scholastic behavior, coursework, and basic skills. Students must meet the following standards:

- No more than 6 absences and/or missed assignments (excused absences must be permitted by the director).
- 73% or better on coursework (including a passing grade on the final).
- Successful completion of Basic Skills tests.

Coursework

The coursework will consist of homework, quizzes, and exams. Homework will require the use of MathXL. .

Mastery of Basic Skills

The Basic Skills tests cover skills that students are expected to know when entering the course. Students must pass both Basic Skills tests at an 80% proficiency level. Students may retake these tests in order to meet the required proficiency level.

Final Exam

A comprehensive final exam worth 20% of the final grade will be given at the end of the quarter covering all of the course's learner outcomes. The content and type of questions will be similar to quizzes and exams given during the quarter.

Grading

Grades will be determined by the following weights:

Homework 10% Projects _____% Quizzes 50% Exams 20% Final Exam 20%

Grades will be determined by the following scale:

93-100% = A	90-93% = A -	87-90% = B +	83-87% = B	80-83% = B -	77-80% = C
					+
73-77% = C	70-73% = C -	67-70% = D +	63-67% = D	60-63% = D -	Below
					60%=F

Support Services

A drop-in lab is available for students who need help on their coursework. Additional tutoring support may be offered to students who require it—talk to your instructor for more details. Students who have special needs or disabilities that may affect their ability to access information and/or material presented in this course are encouraged to contact the office of Disability Support Services on campus (963-2171).
