

**MATH 273 Multivariable Calculus II**  
**Dr. Boersma**  
**Winter 2011**

- Goals:** We will continue the study of multivariable calculus. In particular we will investigate double and triple integration in different coordinate systems, line and surface integrals, and the major theorems of vector calculus. We will cover (for the most part) chapters 15 and 16 from our textbook.
- Office:** Bouillon 107E, phone: 963-1395, email [boersmas@cwu.edu](mailto:boersmas@cwu.edu). Office hours will be announced in class shortly. You may of course drop by anytime. If I'm not busy I'll be glad to talk with you.

**Materials**

1. **Text:** *Thomas' Calculus: Early Transcendentals*, by Weir, Hass, and Giordano.
2. TI-83/84 Graphing Calculator [*Optional.*]

- Your Grade:** Your final grade in this course will depend on three fifty-minute exams, various collected homework assignments, and a final exam.

- Exams** Three fifty-minute exams will be given in class (300 pts total), thus making attendance mandatory on these dates. Make-up exams will only be given in extreme cases. If you anticipate a conflict, please see me at least one week **before** the date of the exam. The final exam (125 pts) is scheduled for Friday March 18, 8:00 – 10:00. This time is scheduled by the registrar's office and cannot be changed! Please make travel plans accordingly.

**Collected**

- Homework** I will periodically assign problems to be handed in and graded. Sometimes these problems will be taken directly from our textbook and other times you may find them a bit more challenging than the textbook problems. In either case, I will be looking for neat, clear, and concise solutions containing complete and eloquent explanations. These homework assignments are an integral part of your course grade and give you the opportunity to show me your mastery of the subject in a non-testing environment. It will be made very clear in class when an assignment is to be handed in to be graded. Pay close attention to the due date! Late homework may not be accepted and will not receive full credit.

**Other**

- Homework** There will be **daily** homework assignments from the textbook. It is **your responsibility** to keep up with these assignments. Although most of these problems will not be collected or graded, they will be the basis for all of the exams in the course. Keep up. Do well on these problems and you should do well in the course! If you find yourself struggling with these daily homework assignments, please come by and talk to me.

**Attendance** I will assume that everyone attends every class meeting. If you happen to miss a day, be advised that you are still responsible for any assignments that were given or turned in. Feel free to come by my office to discuss the day's activities that you may have missed.

**Final Grades:** As mentioned in part above, your final grade will depend on

Collected Homework	100 pts.
Three in-class exams (100 pts each)	300 pts.
Final Exam	125 pts.
<b>TOTAL</b>	<b>525 pts.</b>

While I reserve the right to “curve” final grades as I deem appropriate, your grade will be no lower than:

A :525– 485	C+: 416– 401
A-: 484– 469	C: 400– 380
B+:468– 454	C-: 379– 364
B :453– 433	D+: 363– 349
B-: 432– 417	D : 348– 328
	D- : 327– 312

Students who have special needs or disabilities that may affect their ability to access information or material presented in this course are encouraged to contact me or Robert Harden, ADA Compliance Officer and Director, ADA Affairs and Student Assistance on campus at 509-663-2171 for additional disability-related educational accommodations.

---

### **DATES TO REMEMBER**

- Exam 1: January 28
- Exam 2: February 16
- Exam 3: March 8
