

Math 413 Winter 2011
Introduction to Stochastic Processes

Instructor: Dr. Kathy Temple

Office: Bouillon 107B

Phone: 963-1389

E-mail: templek@cwu.edu

Webpage: <http://www.cwu.edu/~templek>

Office Hours: MW 2:30 - 3:30 PM, T 1:00 - 1:50 PM, Th 12:00 - 12:50 PM, and by appointment.

Course Goals: Students will understand basic topics related to stochastic processes, including conditional probabilities and expectations and the uses of conditioning in computations; Markov chains; Poisson processes and non-homogeneous and compound Poisson processes; and Brownian motion. As time permits we may discuss discrete-time martingales.

Prerequisite: Math 411A or permission.

Required Text: Durrett, *Essentials of Stochastic Processes*, Springer, 2004. Make sure that you have the corrected second printing! To check, read the last couple sentences of the preface. There is an errata list on the author's webpage (just google him) and I strongly encourage you to print a copy and keep it with your textbook.

Chapters Covered: We will use sections of Ross' *Introduction to Probability Models* to talk about conditioning (approximately $1\frac{1}{2}$ weeks). Then we will cover chapter 1 (approximately $2\frac{1}{2}$ weeks), chapter 3 (3 weeks), and chapter 6 along with parts of chapter 2 (2 weeks).

Evaluation:

- Homework (30%).
- Problem session write-ups (10%); see below.
- One midterm exam (25%); tentative testing date: Wednesday, Feb. 9.
- Comprehensive final exam (35%); Tuesday, March 15, 12-2 PM.

Course Conduct:

- **Required Materials:** The textbook is required. You will also want to have at least a scientific calculator.
- **Homework:** Homework will be assigned often in class and due dates will be announced at the time of the assignment. Homework must be done neatly, *stapled*, and written on clean-edged paper. Your work should be clear, in a logical order, and provide sufficient explanation. What's sufficient explanation? A good guide is to think about whether another student in the class who didn't know how to do this particular problem could understand your solution. This will also help you understand your solution later! Collaboration on homework is permitted, but **copying is not permitted**. A good rule of thumb is that you should write up a problem on your own, even if you worked with others to figure it out. Credit will not be given to any party for work which is identical. I reserve the right to change this syllabus, including evaluation procedures, if copying becomes a problem. Credit will not be given for late homework.
- **Problem session write-ups:** We have "problem sessions" approximately once/week for the last 50 minutes or so of class, where instead of covering new material in class you will be

given several problems to work on. These will typically be on Wednesdays, but the day may shift around a bit. You are encouraged to work on these with others in the class. At the end of class students will be assigned to write up solutions to the problems to be distributed to the rest of the class. You will be assigned one problem per week. When writing up a solution to a problem, remember that your fellow students are going to be reading it. This means that it needs to be legible – if you have particularly poor handwriting, this might be a good time to learn to typeset mathematics – and provide enough detail that your fellow students can easily follow your solution. English words (or sentences!), pictures, etc. are encouraged. *Your solution must either be submitted to me electronically or in a form suitable for scanning.* To receive credit, your correct solution is due to me by 3:30 on the following Monday. You are welcome, and in fact strongly encouraged, to discuss your solution with me before it is due, and I will be happy to read drafts, etc. Solutions which are at most two business days late will be given half credit; no credit will be given for later solutions. Credit will not be given until a solution is correct and reasonably well-written.

- **Exams:** Any changes to the tentative exam schedule will be announced in advance. Make-up arrangements must be made prior to an exam unless you can document an unexpected circumstance beyond your control that prevented you from taking the exam.
- **Other Information:** Students with disabilities who wish to set up academic adjustments in this class should give me a copy of their "Confirmation of Eligibility for Academic Adjustments" from the Center for Disability Services as soon as possible so we can discuss how the approved adjustments will be implemented in class. Students without this form should contact the Center for Disability Services, Bouillon 205 or dssrecept@cwu.edu or 963-2171.

The usual homework assignments and problem session write-ups will be due in the last week of classes.
