or by appointment

Email: woodcock@cwu.edu

Phone: 963-2602

Textbook: For All Practical Purposes (customized version)  
8<sup>th</sup> Edition  
ISBN-13: 978-1-4292-7465-4

**Please silence cell phones during class.**

It is assumed that you have successfully achieved **one** of the following: Successful completion of Math 100B, an SAT math section score of 500 or better, an ACT math section score of 19 or better, or a COMPASS test of 50 or better.

Math 101 satisfies one of the **basic skills requirements**. Your attention in class and your utmost effort will greatly increase your chances of success in this class.

A **scientific calculator** will be necessary for this course. You are not allowed to borrow a calculator during an exam. Make sure you have one of your own and bring it to class. You cannot use your cell phone as a calculator during an exam.

*If you have a request to allow for special learning needs, let me know as soon as possible. Students who have a copy of their "Confirmation of Eligibility for Academic Adjustments" from the Disability Support Services Office and wish to have adjustments in this course should provide me with a copy of the form and discuss their needs with me. Students with disabilities without this form may contact the Disability Support Services Office, Bouillon 205, [dssreceipt@cwu.edu](mailto:dssreceipt@cwu.edu), or 963-2171.*

Feel free to raise your hand for help during class, and as time permits I will answer your questions. If you need more time to clarify your question(s) please schedule an appointment. For the long term your **best bet** is to form a study group with some of your classmates and meet regularly. Go over problems from the assignments and select your own for extra practice. Answers to selected exercises are in the back of your book. Use them to your advantage. Additional help is available in the Math tutoring center in Hertz 101.

Assignments will be made on a regular basis in class. Please attempt all problems assigned since your grade will depend on completion of all problems, and your understanding of the concepts will increase. The syllabus, class notes, and assignments will be posted on BlackBoard.

Homework will be collected on the Friday of every week except the week of the midterm exam. Approximately 3-4 questions will be selected from the homework to be graded. Your grade for any given homework assignment will be 5 points per problem graded plus 5 points for completion of all homework.

There will be a number of group take-home assignments that will involve the concepts that are learned in this course. Each assignment will be worth 25 points. Groups must consist of **three or four** members. Members of each group will share the grade earned by the group. If a member does not participate fully in the group that person's grade will be reduced accordingly. If students have trouble finding a group I have the option of assigning those students to a group(s) where they can be fitted in.

There will be a midterm exam and a final exam. Each exam is worth 100 points. Both exams will consist of problems similar to homework and short situations similar to group work.

Total points for the course will depend on how many homework assignments and how many group assignments are graded. Assignments will **not** be weighted. **Retain all graded work through the end of the quarter in case you have a disagreement with your grade.**

Letter grades will be based on the following percentages:

A	93 – 100	C	73 – 76
A-	90 – 92	C-	70 – 72
B+	87 – 89	D+	67 – 69
B	83 – 86	D	63 – 66
B-	80 – 82	D-	60 – 62
C+	77 – 79
