

Math 130.006: Finite Math

Meeting Daily 10:00 – 10:50 in Hertz 105

Instructor: Tim Brown

Phone: 509-963-1720

Email: brownti@cwu.edu -- preferred

Office: Samuelson 218A

Office Hours: 3:00 – 3:50 Daily (*and by appt.*)

Course info on Canvas website, through mycwu.

Description: Finite math is a 5-credit introductory course on probability and statistics. It is designed to prepare you for further courses in statistics and every day interpretations. The topics we cover will include the language of sets, counting procedures, probability, and introductory statistics. You will be expected to apply skills and ideas to problem-solving scenarios in addition to learning procedures.

Time: The general rule of thumb for college is 2 hours outside of class for each hour in class. Expect to spend 5 - 10 hours per week besides class time to be successful (some may need more, some less...) You choose to succeed or not largely by how you choose to spend time and energy. You will be receiving a schedule template to help you plan for success – you will need to block out 15 – 30 hours in your weekly routine for homework if you are a full time student (5 – 10 hours for this class).

Attendance, participation, homework. Be here, pay attention, ask questions, do your work, get help when you need it, and you will succeed. If you must be gone, you are responsible to access my canvas website for information, and keep up with the work. Absences will hurt your grade in several ways:

- You miss your best opportunity to learn the material and/or ask questions
- You will miss in-class activities, which you may not be able to make up
- You may waste a quiz retake opportunity
- You will miss getting your perfect practices checked in a timely manner – and may be unsure what the expectations are in terms of showing work, labelling, etc.

Expectations:

Uni-tasking! The (lost) art of doing one thing at a time, focusing, and doing it well. Turn off your phones, ipods, ipads, cortical implants, etc. during class... She will still love you in 50 minutes. The birds will still be angry. Some people will still call him Maurice. The fruit will still need to be ninja-ed. If you are here, be truly here.

Respect yourself: Believe your education is important enough to put forth the effort. Your future is worth investing in.

Respect others (real or simulated respect) – me, classmates, the school, etc. In order to create and sustain a safe and inclusive environment for learning, we have a shared responsibility to treat each other with dignity and respect. Mutual respect and nondiscrimination includes freedom from sexual harassment. Honesty is also absolutely essential.

Materials:

- A scientific calculator is required. Smart phone apps will not do, as you can't use a phone during quizzes and tests (hopefully for obvious reasons). It does not have to have graphing features – a \$10 scientific model is fine if it has probability features like permutations and combinations.
- Colored pencils are recommended, but not required. Especially useful if you are a “visual learner.”
- Text: Finite Mathematics: Introductory Probability and Statistics by Owen and Cutlip.

Extra Help: Do not hesitate to come see me at my office. My office hours are listed on the front of this page, and I'm available other times by arrangement. Also, the University Math Center, located in ARC on the first floor of Brooks library has very generous drop in tutoring hours. Kahn academy (www.khanacademy.org) has an organized collection of over 2,400 tutorial videos, with special emphasis on math.

Grading:

○ 20%	Final Exam	A	92%
○ 40%	Chapter Tests	A-	90%
○ 20%	Quizzes	B+	88%
○ 10%	“Perfect Practices”	B	82%
○ 10%	Homework Completion	B-	80%
		C+	78%
		C	72%
		C-	70%
		D+	68%
		D	60%
		F	Below 60%

Homework is assigned almost every day, and needs to be done that day. For each unit, you will turn in a stapled packet with assignments and problems in order, clearly labeled, with work shown in the manner prescribed on the day of the unit test.

Perfect Practices are short tasks, usually one to three questions, done during the last 10 minutes (+/-) of class. They must be completely perfect to get credit, or you keep working until they are, and then they get stamped. This ensures you are on the right track before you do the homework practice, and also provides an example you have worked out correctly for reference. You must get these stamped within 2 days of their being assigned. Perfect practices will be turned in as a packet on the day of the test.

Quizzes will be short – usually about 10-20 minutes each – and may sometimes be unannounced. You may make up or retake up to 3 quizzes this quarter. You must bring stamped perfect practices and completed schedule to be eligible for a retake, and you must come see me outside of class – during office hours or by other arrangement. Deadline for retakes is the day before the next unit test. If you are absent the day a quiz is given, the retake is your only chance at the quiz.

Unit tests and the final exam must be taken on the days assigned; you will know at least a week ahead. Other times will be arranged only for the direst of circumstances (family funeral is valid if it is your own ☺). You will be allowed the option of either a handwritten note card, or the formula sheet I provide, along with some useful tables. My formula sheet will be the same as the one I give you early in the quarter.

Projects: One major project (during the last week) will be scored as a large quiz.

Late work: No such thing. I give extra opportunities on some tasks, but when they are due, they are due.

Cheating = Failure. You are allowed help on homework, and on perfect practices. (“Help” and “copying” are two different things!!) Tests, quizzes, and the final exam are individual efforts. You will receive a zero with no chance for make up if you copy, help, hint, check, “access extra resources” etc. You will also forfeit any remaining quiz make-up opportunities.

Accommodations: If you have a disability and require accommodations for this course please speak with me privately as soon as possible so that your needs may be appropriately met. If you have not already done so, you will need to register with Disability Services (DS). DS is located in Bouillon 140. Call (509) 963-2149 or email cds@cwu.edu for more information.

THE END: Your final exam will be held on Tuesday, December 4: 8:00 – 9:50 AM There will be a project and assignments during the last week of class.
