 accepted!

sets and logic

fall 2020
 math 260
 5 credits

Online course, asynchronous

prerequisites: math 173 (calculus ii) **or** CS 301 (data structures) and MATH 172 (calculus i) or equivalent.

text:

(1991). morash, ronald. bridge to advanced mathematics, second edition. cwu coursepack (reprint. courtesy of mcgraw-hill, inc.)

description:

since the work of david hilbert, in the early 20th century, the axiomatic method has been the very cornerstone of mathematics. this method has, through the centuries, come in and out of favor, but its roots go back to euclid's elements and beyond. now, **any** mathematics must be shown to 'fit' logically into the structure of the discipline.

this is a course about axiomatic systems and the axiomatic method. sets are the building blocks, out of which axiomatic systems are made, logic is the glue that holds them together. proof is the process by which statements about mathematical things are shown to 'fit.'

math 260, sets and logic, represents a transition to advanced mathematics -- all roads to higher mathematics pass through this field.

this quarter we will cover the following in morash:

- o ch. 1 (sets): sec. 1.1-1.4
- o ch. 2 (introduction to logic): sec. 2.1-2.3
- o ch. 3 (introduction to proof): sec. 3.1-3.5
- o ch. 4 (methods of proof i): sec. 4.1-4.4
- o ch. 5 (methods of proof ii): sec. 5.1-5.2
- o ch. 6 (equivalence relations): sec 6.1-6.3
- o ch. 7 (functions): 7.1-7.3

check out the [math 260 topical outline](#) .

evaluation:

your grade will be determined by two exams (approx. 30% ea.) and a final examination (approx. 40%). These exams will be take-home and occur roughly on weeks three, six, and nine.

there will be several unannounced, straightforward quizzes worth exactly 0% of your grade. use the quizzes to get an idea of the kinds of questions that will appear on the exams.

student learner outcomes

the most important things you learn in school are not going to be measurable, sorry. in fact, the absolute best service a list of 'student learner outcomes' could possibly provide is as a random sample of behavioral objectives. that said, at the end of this course, you will have a reasonable facility (as measured by the evaluation procedures described above) in manipulating sets, creating truth tables, identifying logical forms, and constructing sound mathematical proofs with a variety of techniques. By the way, when we use the phrase 'elementary set theory' to describe this course, the word 'elementary' should not be confused with 'simple.'

fun with influenza

if you have a severe respiratory or influenza-like illness (ILI) (high fever, aches, chills, cough) **you should not come to class until you are without fever for 24 hours without the aid of fever-reducing medication.** if your absences are related to a severe respiratory or flu-like illness, you will be given the opportunity to make up your assignments and class content without penalty. it is your responsibility to notify your instructor *in advance* when absent due to the flu. faculty is under no obligation to excuse class absences related to sickness. If you are pregnant, work with your instructor to prevent exposure to influenza. you should utilize the following precautions to prevent exposure:

- 1) frequent hand washing and carry a bottle of alcohol-based hand sanitizer with you at all times.**
- 2) cough etiquette (grab your shoulder and cough into your elbow).**
- 3) place used tissues immediately in the trash, followed by washing your hands.**
- 4) use [CDC](#)-approved disinfectants on shared surfaces such as doorknobs, desks, etc.**
- 5) Stay home if you have a severe respiratory or flu-like illness.**

If you are concerned you may have seasonal influenza, notify student health. plan for potential absences and assure you have access to the internet and blackboard for assignments. regardless of your flu status, you must complete the requirements of the course to receive a passing grade.

note

students with disabilities who wish to set up academic adjustments in this class should give me a copy of their *confirmation of eligibility for academic adjustments* from the disability support services office so that we can meet in order to discuss how the approved adjustments will be implemented in this class. students with disabilities without this form should contact the disability support services office, bouillon 205 or

dssrecept@cwu.edu or 963-2171 as soon as possible.

no, no, no!

no late assignments, no early tests, no late tests, no make-up tests
(including finals ... be there).

Fall 2020
There's no place like [home](#)

Submitting Your Work

- 1)** Answer the questions on your own paper.
- 2)** Scan or photograph your answers and *attach the file as a .pdf* to an email and send it to me at the email address below.
- 3)** The best way to submit is via email:
slewis@fulbrightmail.org
- 4)** Have the following in the subject line of your email and as your file name!:
sets exam <number> <your lastname +first letter of your first name>
So, my name being Scott Lewis, my subject line for exam 1 AND my filename would read like this:
sets exam 1 lewiss
(i'm not worried about capitalization, be creative :)
- 5)** Be careful of file size! There are ways to reduce the size of of jpeg and pdf files.

If the technical part of this is a problem, get back to me and we will work it out.

Remember:

Questions are gleefully accepted!

and

Email is good:

slewis@fulbrightmail.org
